Trade Mark Registered
U. S. Pat. Off. No. 300,504

The Yo-Yo is all wound up, ready for a spin when you buy it. The loop projecting from the groove should be made into what is known as a slip-knot and then placed around the middle finger at the first joint.

Turn the palm of the hand upwards, as shown in Figure No. 1, not downward, and allow the top to fall over the end of the finger, as indicated in Figure No. 3.

When the Yo-Yo falls within about 3" to 6" of the bottom, raise hand slightly at the same time turning the palm downward to receive Yo-Yo as it approaches your hand, as indicated in Figure No. 4. If unsuccessful, rewind the string loosely in the groove of the Yo-Yo until the string has taken hold, then wind more firmly until it is all wound up.

Then repeat as previously, until you have mastered the first trick of making the toy race up and down the string. If the Yo-Yo does not come all the way back to the hand the first few times, do not grab it, but continue the motion of raising and lowering the hand until successful in making it return by its own accord to the hand.

If you will examine your Yo-Yo and string closely you will find that the string is only looped around the axle of the Yo-Yo, and by splitting the string nearest the Yo-Yo it can be removed. The string is not firmly attached to the Yo-Yo, but only looped over the axle; so be very careful when rewinding your Yo-Yo that you do not just keep slipping the string around the axle, and always remember that the string is only looped around the axle.

The string used on the Yo-Yo Top is especially made of Egyptian Fibre Cord, and to insure best results insist upon GENUINE DUNCAN EGYPTIAN FIBRE YO-YO STRINGS for your GENUINE DUNCAN GOLD SEAL YO-YO TOP, for sale at any first-class store, 3 for 5c.

While playing Yo-Yo should the string become knotted, untangle and let the top hang free at end of string and wind as in the beginning. After playing, if the cord becomes loose, re-twist tightly before starting to play again. This top is based on scientific principles and it requires practice and patience to obtain the most fun. The different tricks illustrated can be done only with GENUINE DUNCAN GOLD SEAL YO-YO as well as many new ones the user will originate.

INSTRUCTIONS

Thrills Galore Await He Who Masters the Genuine Duncan Gold Seal Yo-Yo

The following different tricks can be done only with Genuine Duncan Gold Seal Yo-Yo as well as many new ones the users will originate:

(1) **THE SPINNER**—Throw Yo-Yo over-hand and outward at arm's length with a snap of the wrist. Yo-Yo will spin at end of string. To bring back give a very slight jerk, and have palm facing down to Yo-Yo ready to catch as it comes up.

(2) **WALKING THE DOG**—This trick is done by first throwing the Spinner and allowing the top to roll along the floor for a short distance before returning to hand.

(3) **THE BREAK AWAY**—This trick is done by casting the top with palm held upward directly opposite right shoulder, drawing hand toward left shoulder, thereby causing top to make a half circle to the left. When the half circle is complete, bring top back to hand.

(4) **AROUND THE WORLD** — (Sometimes called the **AIRPLANE TRIP**)—This trick is done by throwing the top out in front in a circular motion with palm of hand held down while releasing the top. Top goes to end of string and while spinning in the loop at end of string makes a complete circle, returning to starting position and then back to hand.

(5) **OVER THE FALLS**—This trick is done by throwing the Spinner, returning it to the hand and instead of catching the top allowing it to go over the top of the hand and back down to the end of the string and then up to the end for the catch.

(6) **THE CREEPER**—This is done by first throwing the Spinner and allowing the Spinner to creep along the floor to the end of the string, lowering the hand to the floor and returning the top to your hand along the floor.

(7) **LOOP-THE-LOOP**—This trick is done by casting top directly in front, palm held downward before releasing top, throwing in a circular motion which causes top to come back toward hand but instead of catching top with a snap of the wrist send top out again, repeating this several times. This trick is known as Looping-the-Loop or making a Three-Leaf-Clover but can be continued indefinitely.

(8) **ROCKING THE BABY RUTH**—(Instructions for a right-handed YO-YO Player)—Do the Spinner. Wrap the string of the Yo-Yo, while doing the spinner, over the left hand. Draw the left hand up above the right hand and spread the fingers of the left hand until the string is taut. Grasp the loose string at the same point in which the string is attached to the right hand, thus completing the triangle. The next step is to lower the left hand below the right hand, keeping the string taut at all times, in such a way the remaining loose string attached to the Yo-Yo swings through the taut triangle.

(Instructions for a left-handed Yo-Yo player are the same as the above except the hands must be reversed).
